

## Vermont Transco LLC

### TTC/ATC/TRM/CBM values for VTransco's non-PTF Transmission Path

<b>Path</b>	<b>TTC</b>	<b>ATC</b>	<b>TRM</b>	<b>CBM</b>
<b>VTransco- ISONE</b>	<b>9999</b>	<b>9999</b>	<b>0</b>	<b>0</b>

Non-firm transmission service under Schedule 21 is always available. Therefore, it is unnecessary to post daily non-firm service that has become available as a result of not scheduled firm transmission service.

TRM and CBM are presently set to zero will be reviewed as appropriate (at a minimum annually) to verify the values.

If a non-PTF path becomes constrained and the yearly or monthly ATC value changes because of a 10 percent or more change in TTC, VTransco will post a narrative for such path.
